

C400

MICROFILM APERTURE CARD SCAN SYSTEM

THE EASIER, SIMPLER, BETTER WAY TO SCAN

Designed to digitize 35 mm microfilm images and hollerith data from aperture cards, the [C400 scanner](#) creates accessible, searchable images that can be viewed, saved and shared instantly.

Built for on-demand or high-volume batch scanning operations, the C400's versatile and simple operation makes short work of any volume aperture card digitization task.

EXPERT DIGITAL IMAGING IN A COMPACT DESKTOP DESIGN

“With the ability to not only digitize the cards quickly on demand, directly distribute via e-mail or just send direct to scaled print, the scanner's powerful image processing tools have allowed the engineers to easily view and manage the drawings in digital form.”

~ The Royal Air Force Battle of Britain Memorial Flight case study

KEY FEATURES

- Affordable
- High-quality images at full resolution
- On-demand and batch scanning modes included as standard feature
- Hollerith (punch) data automatically read and used to select drawing sizes and file names if required
- Dual-save of both bitonal and grayscale images from a single scan
- Auto White Balance (AWB) produces the best possible grayscale and bitonal images from each card
- Reduced set-up time with high-speed USB connectivity
- Simple and effective interface
- Virtual rescan automatically reprocesses the scanned image with alternative imaging parameters. No need to physically rescan the aperture card.
- Optics, scan engine and Smartcode image processing algorithms engineered specifically for microfilm scanning
- Flexible scanning solution: Capable of scanning any ISO aperture card with no extras or modifications to purchase
